

ANU FURTHER EVIDENCE

SEE BELOW THE FIRST EVERY PICTURES OF AN ELECTRON IN ORBIT.

THIS DAN WINTER VIDEO IS TITLED - "THE ANU - ARCHETYPE OF SELF ORGANIZATION" = SELF AWARE. THE AIR YOU BREATHE IS AWARE, THE BRICKS IN THE WALL ARE AWARE (AND THEY CAN TALK), THE MOUNTAIN IS AWARE (AND IT DANCES WITH JOY), THE FOOD YOU EAT IS AWARE (AND NEEDS TO BE THANKED) - EVERYTHING IS AWARE.

http://beforeitsnews.com/story/1555/901/The_Anu_-_Archetype_Of_Self_Organization.html

A VERY INTERESTING OLD TERM FOR THE ANU - A "tourbillion" WHICH IS A SCROLL WORK MADE OF LIGHT

OF COURSE, THAT LIGHT IS LOVE - GOD'S LOVE.

GREAT!! THE ANU SHOWS CLEARLY IN THE ORION NEBULA - USUALLY WE ONLY SEE THE CENTER DNA PART OF THE ANU, BECAUSE OF THE GREAT DISTANCES IN SPACE THE OUTER SPIN IS TOO LARGE TO PICK UP. PLEASE NOTE THE SACK AROUND THAT ANU, THIS IS ITS AETHERIC HOME.

DAN TALKS ABOUT A TORNADO - SHOWING THAT IT IS ACTUALLY AN ANU WITH TWO SPINS - TORNADOS DEMONSTRATE 2-D ANOMALIES VIRTUALLY EVERY TIME THEY TOUCH DOWN - LIKE EMBEDDING STRAW IN A TELEPHONE POLE OR GREEN GRASS EMBEDDED IN A MIRROR (WITHOUT BREAKING THE MIRROR!!).

IN 2-D THESE THINGS ARE IN A DREAM OR IMAGE STATE AND ARE NOT SUBJECT TO WHAT WE CONSIDER TO BE THE "LAWS OF PHYSICS". THE REALITY IS JUST IMAGES, WHICH CAN MERGE WITH EACH OTHER.

ALL AETHERS ARE 2-D HONEYCOMBS - ALL ANUs LIVE IN AN AETHERIC CELL - THEY HAVE TO - THEY CAN NOT EXIST OUTSIDE OF AN AETHERIC CELL, WHICH IS 2-D IN NATURE. SO, THE ANU, WHICH IS A 3-D OVOID TO US, SEES ITSELF AS BEING 2-D BECAUSE THAT IS ITS ENVIRONMENT. AND YOU'LL SEE SOLID EVIDENCE OF THAT BELOW.

OBVIOUSLY 2-D FLIES IN THE FACE OF CONVENTIONAL THOUGHT I.E. THE 22 DIMENSIONS OF STRING THEORY, THE FOURTH, FIFTH AND SIXTH DIMENSIONS OF METAPHYSICS ETC. ALSO, OBVIOUSLY, THAT SHIT DOES NOT WORK. QUITE SIMPLY - IF PHYSICS WAS ON THE RIGHT

TRACK THEN WE'D BE SEEING LEVITATING SPACE CRAFT (WHICH WE KNOW EXIST). AND IF METAPHYSICS WAS ON THE RIGHT TRACK WE'D SEE A RACE OF ENLIGHTENED BEINGS.

THE TRICK IS TO BREAK INTO THE 2-D MATRIX - NOT OUT OF IT.

FURTHER EVIDENCE IS PROVIDED BY VIKTOR SCHAUBERGER'S OBSERVATIONS OF **NATURE**:
FROM "LIVING WATER" p116-119

Experiments at the Technical College in Stuttgart

In 1952 the federal university concerned with the management of water resources asked Professor Franz Popel of the college to undertake certain experiments to test Viktor Schauburger's theories about water. When Walter and Viktor Schauburger came to participate in the experiments, Professor Popel was unwilling to go through with them. He told minister Kumpf that Schauburger's reasoning went against the laws of mechanics and that he considered that the tests could not provide any technically usable results. Kumpf agreed with Professor Popel but he still wanted the experiments carried out, so that Schauburger's fantasies would finally be discredited.

The experiments got under way, and it was the characteristics of water motion that were first studied. Schauburger started by asking Popel if he ever wondered what happened to water when it left the bath tub. The formation of a funnel shaped spiral could be seen as it drained out - but, what happened after that? A faint glimmer of interest appeared in Popel's eyes, and they constructed a test model with which it was hoped to investigate straight and spiral pipes in order to determine:

1. Can water that flows through a pipe be encouraged into 'a manifold inward flowing motion?'
2. Does the shape of the pipe have any bearing on the development of such a motion?
3. Does the material of the pipe have any bearing on the result?
4. Do molecular structural changes occur in the water during such inward flowing motion?
5. Can such an inward flowing motion be used to prevent pipes from crusting up?

The test model that was built for this experiment consisted of a large container shaped like half an egg. To its bottom was attached a glass pipe several meters long. Into the vessel was placed a hose wound in a spiral, the inside of which was perforated with holes, so that the water flowing out through them created a strong swishing motion within the container. If the water was coloured it could be easily seen that the swirl continued down through the glass pipe, and that the intensity of the colour increased toward the centre of the axis of flow. Professor Popel now began to be seriously interested, and lowered a number of small triangles hung on strings, so that a long prism was formed to enable more exact studies to be made. It was observed that this prism revolved in the same way as the spiral.

Next they wanted to find out how substances that were not water absorbing would behave in this swirl. A measure of sand and fine iron fillings were poured into vessel container.

NOW THIS WILL AMAZE YOU

To their great surprise Popel and his assistants found that these additives were not forced out against the wall of the pipe, but instead were wound together within the axis of the spiral motion and there they seemed to coagulate into egg-shaped forms. These they gathered in a container at the outlet. If one of these 'eggs' were broken apart, there was no moisture to be found within it.

LET NORMAL PHYSICS EXPLAIN THAT ONE - THEY HAVE NO CHANCE TO DO SO, BECAUSE THEY DO NOT ACCEPT THE AETHER NOR THE ANU.

A special control regulated the water flow and with the right 'tuning' a motionless wave of egg-shaped formed inside of the pipe and like a string of pearls could move up and down according to the pitch of the tuning. It was observed that a triple motion occurred in the pipe. There was a spiral motion within a spiral

motion and a motion up and down in long profile. There was also a strange light phenomenon around the pipe.

A SCROLL WORK MADE OF LIGHT. GOD'S LIGHT - EH? THIS IS A HEALING LIGHT AND HAS BEEN USED AS SUCH I.E. SPINNING WATER IS VERY HEALING.

When the tests were completed, Popel was no longer negative, and enthusiastically wished to continue. He said that that he now understood that new factors must apply when a spiral pipe is used. But he was still taken aback at the pipe which Viktor Schauburger then introduced - it was based on the shape of a Kudu antelope's horn. At first he thought it mad to use such an 'outlandish shape', but later he agreed.

They now made tests with a straight test pipe of glass, a straight copper pipe, and finally a strange spiral pipe (which fairly well represented Schauburger's ideas about the cycloid spiral space curve)

The results startled Popel and his associates. The glass pipe which had completely smooth walls caused greater resistance to water than the copper pipe, and it seemed as if the material really influenced the friction. The spiral pipe provided the biggest surprise: with a relatively high flow rate the resistance dropped toward zero, and then suddenly became a negative value. When the rate of flow increased there were certain resonance points when friction was at a minimum. In a straight pipe the resistance increased towards a point when it reached a 'wall'...

The glass pipe was shown to have greater resistance to water flow than the copper pipe, and the precise measurements indicated a tendency to wave building in straight pipes. The water apparently tried to break into wave formation and winding meanders, although it constantly met up with the sides of the pipe, which were not "in step" with its own natural flow. In the spiral pipe, however, water could move as it wanted and so resistance was reduced. Professor Popel wrote about the special pipe, "It seems that in this pipe the pillar of water releases itself from the pipe walls and, freely swinging, rushes forth through the pipe.

Thus, Viktor Schauburger's theories of water motion had been confirmed ...

ACTUALLY HE HAD SUCH CONFIRMATION EVEN BEFORE THE WWII, BECAUSE HE BUILT FLUMES THAT WOULD FLOAT LOGS THAT NORMALLY DID NOT FLOAT.

VIKTOR, ALSO, OBSERVED THAT EGG SHAPED ROCKS WOULD FLOAT IN SOME WHAT TURBULENT WATER AND THAT PARTICULAR ROCKS THAT WERE THE ONLY ONES THAT WOULD LIFT OFF OF THE BOTTOM AND GO DOWN STREAM.

THE EGG, ANU AND SHIVA LINGHAM ARE ALL THE SAME BASIC SHAPE. THE LINGHAM HAS BEEN WORSHIPPED FOR 1000s OF YEARS IN HINDUISM AS BEING THE SHAPE THROUGH WHICH ENERGY PASSES AS IT GOES FROM FORMLESSNESS TO FORM AND VISA VERSA. THIS OVOID SHAPE HAS BEEN FOUND AND OBSERVED BY A NUMBER OF SCIENTISTS THROUGH THE YEARS.

NOW THE COUP DE GRAS: SNICKER

YEARS PRIOR TO 1952 SCHAUBERGER HAD ANOTHER SOME WHAT SCEPTICAL SCIENTIST TO TEACH, PROFESSOR FORCHEIMER FROM p36-37 IN "LIVING WATER"

Forcheimer launched himself into the project with his customary zeal. He studied the chute, analysed its profile and curve mathematically, looked at the charts of water movement and temperature - in short, he directed all of his considerable knowledge as an accepted expert on water and waterworks to the problem, but without success.

He changed tactic and began instead to shadow Schauburger following him everywhere ceaselessly questioning him. At first he merely obtained short and crusty answers

After a while Schauberger discovered that Forcheimer was different to the scientists that he had met earlier. He was not derisive and superior but became more and more worried at meeting something he did not understand. TOO BAD THE REST OF THE WORLD IS NOT AS CHILD LIKE AND THIRSTING FOR KNOWLEDGE.

So they wandered in the woods ... Schauberger showed him the natural phenomena (THIS EVEN INCLUDES WHY TREES GROW BRANCHES WHERE THEY DO - IT IS A FUNCTION OF HOW PERISTALTIC ACTION AND OSMOSIS WORKS IN THE TRUNKS OF THE TREES TO RAISE WATER AND NUTRIENTS. SOME TREES REQUIRE SHADE FOR THAT TO HAPPEN, THUS BRANCHES. SCHAUBERGER'S INFO IS AWESOME).

The two men stood beside a mountain stream deep in discussion. Suddenly Schauberger said,

'Can the Professor tell me where the water is coldest, before or after it has flowed around that stone? - and he pointed to a stone out in the stream, which had been worn away to a particular shape. 'There is not the slightest doubt that the water is colder before it has passed the stone.', answered Forcheimer, and then he began to explain how the friction against the stone increased the water temperature. 'Completely wrong', replied Schauberger. 'The water is colder below (i.e. down stream from) the stone.'

A forceful debate ensued.

3-D LOGIC IS THAT THE WATER ENCOUNTERS FRICTION AND ENTROPY AS IT GOES AROUND THE ROCK AND THUS SHOULD BE WARMER AS IT GOES DOWN STREAM.

SO, SCHAUBERGER HAD A THERMOMETER WITH HIM AND HE WENT OUT INTO THE STREAM AND MEASURED THE TEMPERATURE ABOVE AND BELOW THE STONE - THE TEMP BELOW WAS 2/10ths OF A DEGREE COLDER. FORCHEIMBER DID NOT BELIEVE THIS AND AT 72 YEARS OF AGE GOT HIMSELF OUT INTO THE FREEZING COLD STREAM AND FOUND THAT THE WATER BELOW THE STONE WAS, IN FACT, COLDER.

OK - NOW WHY?? DEFIES LOGIC DOES IT NOT?

ANSWER: THE WATER HAS A LONGITUDINAL SPIN FROM THE ROCKS ON THE BOTTOM OF THE STREAM, NOW IT IS FORCED TO HAVE ALSO A VERTICAL SPIN DUE TO THE LARGER ROCK - THE TWO OPPOSITE SPINS OBTAIN THE SAME AXIS DUE TO SPIN RESONANCE - ONE YOU SEE AND ONE YOU DO NOT SEE WHICH IS TYPICAL - ONLY 3-D IS SEEN IN OUR REALM - 2-D ENERGIES CAN'T BE MEASURED. THE TWO SPINS CAUSE AN ANU TO FORM, WHICH IS A 2-D CONSTRUCT AND WHICH ESCHEWS TIME AND FREQUENCY/ HEAT.

THE SAME LOGIC APPLIES TO THE WATER FLOWING THRU THE KUDU'S HORN PIPE ABOVE I.E. THE WATER CLUSTERS FORM ANUs, WHICH IS THEIR ROOT NATURE. THE ANUs ARE 2-D AND NOT SUBJECT TO ENTROPY, FRICTION ETC. THUS, THE WATER GETS COLDER AND ACTUALLY SPEEDS UP AS IT FLOWS THROUGH THAT PIPE - IT BECOMES SUPER CONDUCTING.

THE ENERGY THAT FLOWS IN A SUPER CONDUCTOR IS LIGHT IN THE FORM OF PHOTONS WHICH ARE ANUs - THE WATER FLOWING IN THE PIPE WORKS IN THE EXACT SAME MANNER - IT EVEN GIVES OFF THE LIGHT.

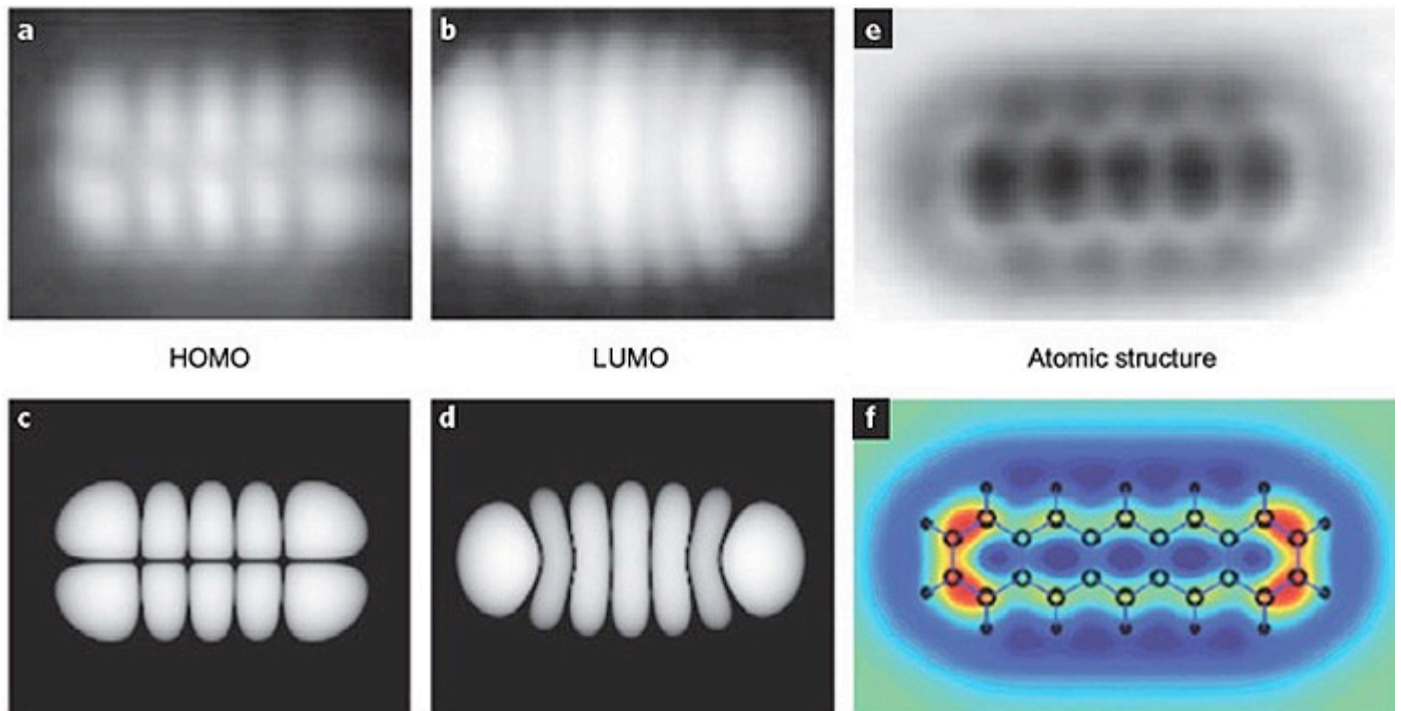

SO, THIS CLEARLY SHOWS THAT THE ANU IS A 2-D ENERGY FORM.

THE ORIGIN OF LIFE IS AN ANU: http://blog.hasslberger.com/docs/THE_ORIGIN_OF_LIFE-5.PDF

AND EVERYTHING IS AWARE I.E. HAVING THE ABILITY TO STORE AND ORGANIZE INFORMATION: http://blog.hasslberger.com/docs/CONSCIOUSNESS_IS_EVERYWHERE.pdf

08/29/11 - First-ever images of an electron in orbit

EACH BLIP IS AN ANU IN ITS AETHERIC CELL - THE AETHER IS CLEARLY DEPICTED AS THE ATOMIC STRUCTURE PHOTO.

SEE - THE ELECTRON BLINKS IN AND BLINKS OUT AS IT TRAVERSES THE AETHER. THE ELECTRON ITSELF IS ACTUALLY AN ANU - SOME WHERE IN MY WRITINGS THERE IS A PICTURE OF IT THAT SHOWS THIS CLEARLY. THE BLINKING ASPECT HAS BEEN KNOWN SINCE NEILS BOHR'S TIME - THEY SAW IT ON THE PHOTOGRAPHIC PLATES - EVENLY SPACED DOTS AS ALL SUB-ATOMIC PARTICLES BLINK IN AND OUT. THUS, EVERYTHING DOES THAT. ABOVE IS IRREFUTABLE PROOF OF IT - UNFORTUNATELY THE PHYSICISTS DO NOT UNDERSTAND SIMPLE PICTURES.

AS EVERYTHING BLINKS BACK INTO 3-D, IT IS NECESSARY FOR TORROIDS TO FORM IN THE AETHERS. TORROIDS ARE REQUIRED TO MAKE ELECTROMAGNETIC WAVES, OF ALL KINDS - LIKE MUSIC. THUS, AS THE TORROIDS CLANG TOGETHER TO MANIFEST NATURE, A HARMONIC MUSIC IS CREATED, KNOWN AS THE MUSIC OF THE SPHERES, WHICH IS WHY THE NATURE SPIRITS DANCE AND SING CONSTANTLY.

http://blog.hasslberger.com/docs/TREES_ROCKS_MOUNTAINS.pdf

THIS IS THE ROOT OF THE DIVINE DANCE OF SHIVA AND SHAKTI IN THE HINDU.

It was only two years ago that IBM showed us an image of a complete molecule, atomic bonds and all, but today's news does that one infinitesimally-sized breakthrough better. Ladies and gents, behold the first image of an electron's path. Utterly amazing stuff! The IBM breakthrough was amazing enough, but now we have images of the electron's orbital path around a nucleus! This is good, good news, because until now physicists only had models and hypotheses to work with... As was the case with the pentacene molecule with IBM (top left in the image), an atomic force microscope was used to capture the electron pathways, presented as darker gray bands in the other two images at center and upper left. As a quick refresher on AFMs, they're the microscopes that use atom-sized needles to measure individual atoms that pass underneath the pointy end. - [Full Article Source](#)

BLESSINGS,
