

QUANTUMS OF NESTED AETHERS

EACH OF THESE GRAINS ARE A QUANTUM PACKET INSIDE OF WHICH EXIST ALL THREE FORMS OF THE AETHERS I.E. SQUARE, PENTAGONAL (THE SKIN AND THE TRANSITION TO:), THE HEXAGONAL AETHERIC ARCHETYPE THAT YOU SEE.

ALL SOVEREIGN STAND ALONE THINGS HAVE TO HAVE A SKIN AND THUS THE PENTAGONAL AETHERS. AND, OF COURSE, ATOMIC AND SUB-ATOMIC REALM EXISTS IN THE SQUARE AETHERS, WHICH ARE PRESENT IN ALL MATTER.

GENTLE PEOPLE

THE BASIC IDEA OF THE HOLOGRAPHIC 2-D UNIVERSE IS THAT IT IS SIMPLE

BUT, WE HAVE ANOTHER LAYER OF THE AETHERS TO CONSIDER!!!

Patrick Flanagan to me

Square to Pentagonal to Hexagonal

G Patrick Flanagan, MD.

AND IT'S NO KIDDING, PLAIN AS THE NOSE ON YOUR FACE AND IT HAS TO BE - THERE IS A BOUNDARY LAYER OF PENTAGONAL AETHERS BETWEEN THE SQUARE AND HEXAGONAL AETHERS. JUST AS IT SHOWS ON THE BUTTERFLY EGG BELOW - THANKS SEPP.

PATRICK SAYS THAT THIS IS WHERE THE FRACTALS START, WHICH MAKES A LOT OF SENSE FOR THIS REASON: JUST UNDER THE SKIN OF ALL THINGS IS WHERE GROWTH OCCURS I.E. STEM CELLS BECOME DIFFERENTIATED.

ON HUMANS THIS LAYER IS CALLED COLLAGEN, WHICH IS CONNECTIVE TISSUE AND IS SUPER CONDUCTING I.E. NON-POLAR.

SO, SCIENCE REALLY HAS TO WAKE UP AND SMELL THE AETHERS, PLEASE. THERE IS A LOT WE NEED TO KNOW ABOUT THEM - IN PARTICULAR, THEIR EXACT SIZES - BECAUSE THINGS THAT ARE IN HARMONY WITH AN AMBIENT AETHER ARE ETERNAL - LIKE HONEY AND GRAPENE, WHICH IS THE HARDEST STRONGEST SUBSTANCE KNOWN TO MAN, IT IS ALSO SUPER CONDUCTING - ONE CARBON ATOM THICK, 1500 TIMES THINNER THAN A HUMAN HAIR, YET A STRIP OF IT WILL PICK UP AN ELEPHANT!!!!!!

WE NEED TO LEARN THE EXACT SIZES OF THE AMBIENT AETHERS AND WORK WITH THOSE SIZES, PLEASE. AND THIS PENTAGONAL BOUNDARY LAYER NEEDS A LOT OF THOUGHT - AT THE END OF THE DAY, THE ANSWER IS ALWAYS, LIKE ATTRACTS LIKE.

LOVE AND BLESSINGS

PS: THE SIMPLE FACT THAT THERE ARE AETHERS LEADS TO THE NECESSARY FORMATION OF TORROIDS IN THE AETHERS TO PRODUCE VIBRATIONS. THUS, THE FINE DETAILS ARE CORRECT:

http://blog.hasslberger.com/docs/FINE_DETAILS-2.pdf

BUT, THE FIRST VIBRATION HAD TO BE EITHER THE COSMIC BACKGROUND RADIATION OR THE UNIFORM TEMPERATURE, WHICH IS MORE STABLE THAN THE BACKGROUND RADIATION. KNOWING THE EXACT SIZES OF THE AETHERS WILL ALLOW US TO EASILY FIGURE OUT THE SMALLEST TORROID STEMMING FROM THE PENTAGONAL AETHERS

THIS CLEARLY SHOWS THE TRANSITION BETWEEN THE SQUARE, PENTAGONAL AND HEXAGONAL AETHERS
