

Russian Human Genome Project discovers Extraterrestrial abilities to modify DNA through a "biological internet"

by Mary Rodwell [Excerpted]

Some recent Russian DNA discoveries documented by Grazyna Fosar and Franz Bludorf in their book *Vernetzte Intelligenz* have been summarized by Baerbel. 'The human DNA is a biological Internet' with evidence that DNA can be 'influenced and reprogrammed by words and frequencies.' This suggests that 'our DNA is not only responsible for the construction of our body, but also serves as data storage and communication.' The Russian scientists and linguists have found that the genetic code 'follows the same rules as all our human languages.' In effect, human language did not appear coincidentally but is a reflection of our DNA.

The Russian researchers believe that 'Living chromosomes function just like a holographic computer using endogenous DNA laser radiation. This means that they managed to modulate certain frequency patterns (sound) onto a laser-like ray which influence DNA frequency and thus the genetic information itself. Since the basic structure of DNA-alkaline pairs and language is of the same structure, no DNA decoding is necessary. One can simply use words and sentences of the human language! This, too, was experimentally proven!' Of course the frequency has to be correct. But for the purposes of this article, the Russian research shows how science now can demonstrate a way to reprogram DNA through language and frequencies.

"Experiencers" who manifest unusual languages, such as Rochelle (see the video *Expressions of ET Contact: A Communication and Healing Blueprint?*) call these 'soul languages'. Rochelle vocalizes them when doing energy work and healing. Healing with sound and frequencies takes on a new meaning in this context. It could mean that Rochelle and others like her may well intuitively be able to change or reprogram DNA through such frequencies while healing. We already know that our subconscious is affected by subliminal frequencies and hypnosis, and the Russian research may have given us a scientific explanation why such techniques work so well. The question is whether the specific frequencies of these languages are designed to affect or reprogram our human DNA? This may well give us grounds for reviewing ancient texts in regards to our origins.

The Russian DNA research article coincidentally mentions the changes in our children in terms of group consciousness. They comment that 'if humans with full individuality would regain group consciousness they would have a godlike power to create, alter and shape things on Earth and humanity is collectively moving towards a group consciousness of a new kind.' They state that 'fifty percent of children will become a problem as soon as they go to school, since the system lumps everyone together and demands adjustment. But the individuality of today's children is so strong that they refuse this adjustment and resist giving up their idiosyncrasies. ... At the same time more and more clairvoyant children are being born. Something in those children is striving more towards group consciousness of a new kind and it can no longer be suppressed.'

Are the Russian researchers in fact referring to what is now called the ADD (attention deficit disorder) child? Unfortunately, because there is no funded global research it's hard to gain accurate statistics. But, if the process of labeling children as ADD is an indicator of this phenomenon, then we are indeed evolving at an astounding rate.

The global perspective and more pieces fit the puzzle: Science, anthropology, theology, archaeology and the kids.

This short article entitled 'Learning to communicate with extraterrestrials: young children in India-China Himalaya use strange sign language' appeared on the website of *India Daily* (29 Jan 2005) by a staff reporter:

'In the deep region of Himalayas, people are reporting strange behaviors in children. The children are using sign languages which are unknown to their families and anyone around. Many of the children draw pictures of triangular objects flying in the sky. Many of them do not know what they saw and how they learnt these sign languages. Some in the region of Aksai Chin believe that these children regularly communicate with the extraterrestrials who are only visible to these children and communicate via telepathy. The children learn the sign language to communicate back to these beings. According to UFO research materials, some Mexican children also manifest similar behavior, when many in the area reported for a long time UFO sightings. ... According to some teachers in the schools in that area, young children are extra agile and extra talented these days. Their problem solving skills have increased and they are much more disciplined. They continually use a strange sign language among themselves. However they cannot teach this language to adults! The locals in the area believe UFOs have been visiting the area for thousands of years. It stopped for a while and now it has started again.' (See: www.indiadaily.com)

Families have contacted me from all over the globe, not only from Australia, Europe, North and South America, but Asia and Russia, and all describe children advanced from the norm in psychological and physical development and with exceptional psychic abilities.

In Mexico City these same "New Humans" have begun to emerge, and it is said that over 1000 children are able to 'see' with various parts of their bodies. In some countries, government agencies interested in such children are actively researching the phenomenon. China has a program for investigating children with similar abilities, which is taken very seriously by the Chinese Government in Beijing. The book *China's Super Psychics* by Paul Dong and Thomas Raffill describes children with exceptional human functioning (EHF) who display similar patterns to Indigo or Starchildren. They, too, are very psychic and intuitive, for example some have the ability to open flower buds by thought alone. And like the Mexican children, many have shown an ability to see with other parts of their bodies. They display telekinetic abilities as well as other fascinating multi-dimensional skills, such as sensing another's thoughts (telepathy). It has also been reported that the Chinese government has observed these children changing the human DNA molecule in a petri dish before cameras and scientific equipment to record this supposedly impossible feat. We have no evidence to prove that these abilities are the result of extraterrestrial interventions. But, given the fact that the Chinese government is very secretive, this may well be something they do not feel ready to share. However, I am told that the Chinese are extremely interested in the UFO phenomenon and take it very seriously.

More pieces of the puzzle

Although I can't cover all my research in this article, I can give the reader some points to ponder. The late Francis Crick, Nobel Prize winner, co-discoverer of the shape of the DNA molecule and author of *Life Itself*, made the astounding claim 'that an advanced civilization transported the seeds of life in a spacecraft'! One wonders what led him to such an incredible conclusion. References in religious and biblical texts certainly raise questions as to our real origins. Anthropology still can't explain how we changed or morphed so dramatically from Neanderthal to Homo sapiens and the missing link has not been discovered or explanations given on how the developmental gap was bridged. Biblical scholar, Zecharia Sitchin, author of *the Earth Chronicles* suggests such answers could lie in ancient religious texts, such as the Bible. According to Sitchin, the Bible is a condensed rendering of ancient Sumerian and Akkadian texts. From his research he believes that Homo sapiens was a "genetic upgrade" of existing hominids which was undertaken by extraterrestrial beings called the Nephilim who came to Earth 450,000 years ago.

Indigenous tribes worldwide have within their oral history that they are visited by sky beings and are being genetically upgraded. The Dogan tribe (African Mali Tribe) call the star visitors the Nummo, an alien species which came from Sirius and genetically upgraded humans when they came to Earth. The Aborigines of Australia also talk of the sky beings Wandjina, who made them and gave them laws to live by.

For those who seek to explore, there are many such anomalies in archaeological, anthropological, religious and spiritual texts that must guide the thinking person to question what we are educated to believe in terms of our origins and genetic heritage. But, the most compelling evidence comes from the testimony of children, many of them not old enough to read. It's information so profound one has to wonder how and where they obtained it.

Mike Oram ("experiencer") resides in the United Kingdom. He told me that he was only 4 years old when he told his mother that there was no such thing as death. His mother disagreed, but Mike said 'the Universe goes on for eternity and it's not true that we no longer play a part in the Universe. We come back.' 'I was too young to know the word reincarnation', he said. 'I then shocked her by saying "You are not my real parents, my parents are in space, and something of incredible importance will happen in this planet and it will affect all levels of consciousness, it will not happen in your life time but it will in mine." My poor mother never forgot that conversation' (Mike Oram).

Colin Wilson in Alien Dawn (1998) wrote that not long before Andrija Puharich's death he asked him what he was working on. 'Paranormal children', he said: 'You wouldn't believe how many of these kids are out there, they seem to be at genius level. I know dozens, and there are probably thousands.' Wilson concludes, 'And this, I suspect is the beginning of the change that the UFOs are working on' (p.309).

Unfortunately many such phenomena are only recognized through a particular discipline's limited field of study, and this sadly narrows the perspective. There is no doubt that, for some, the extraterrestrial hypothesis is a hard one to swallow. But even if (for now) we interpret this data from a desire to understand why we may be evolving so rapidly, as this research suggests, we need to be open to all possibilities. Even if the puzzle is just perceived as another way of understanding ourselves, the question remains that, if we are evolving at an accelerated rate that cannot be explained in normal evolutionary terms, how and why is it happening?

Are "starchildren", "New Humans", Indigos and smart kids, etc., one and the same phenomenon? If they are, then the extraterrestrial hypothesis makes more sense. After all, it is ludicrous for the thinking person to believe we are the only intelligent life in the universe, given the vastness of space. And it is logical to believe that some of those other life forms may have evolved sufficiently to be able to visit us, even if how they travel here may be beyond our current scientific understanding.

The hypothesis of extraterrestrial reality is not only possible but also probable and explains many anomalies in our origins, our mythology and religions. Certainly, if what experiencers and indigenous people tell us is true, we have a very intimate and on-going relationship with the visitors, in addition to a common gene pool. This would certainly explain their continuing interest and participation in our evolutionary development.

The primitive and aggressive nature of *Homo sapiens*, armed with technology to destroy not only each other but our beautiful planet, may well be why these ET ancestors have decided to accelerate humanity's evolutionary upgrade program. A "New Human" with multi-level awareness of our cosmic connection to all that is, may well be the only way we will finally appreciate what we have, change our behavior, and grow up to take full responsibility for ourselves and this beautiful planet.

The starchildren could be an integral part of this wake up call and it may be that through them we are being led to an understanding of this profound connection.

'Human beings are here to remember themselves, with conscious awareness and with complete understanding of their innate connection to the Universe.' — T. Taylor.

If quantum theory is correct, science can't disagree that we are indeed connected to everything, including our extraterrestrial visitors! 'To them we are the aliens!' — Jess, (8 years old, Western Australia). What can I say: 'Out of the mouths of babes!'

About the author:

Mary Rodwell, RN, former nurse and midwife. Counselor and hypnotherapist, metaphysician. Principal of ACERN (Australian Close Encounter Resource Network), Perth, Western Australia. Mary has traveled widely, visiting the USA and UK as an international speaker. Author of *Awakening: How Extraterrestrial Contact Can Transform Your Life* (2002). Producer of EBE award winning documentaries: *Expressions of ET Contact: A Visual Blueprint?* (2000) and *Expressions of ET Contact: A Communication and Healing Blueprint?* (2004). Produced by ACERN. Web address www.acern.com.au and www.maryrodwell.com, E-mail: Starline@iinet.net.au.

To date over 1200 people have contacted ACERN, nationally and internationally. ACERN is a professional counseling resource that explores all anomalous experiences as well as speaking to professional traditional agencies about these matters and contact reality. Mary's research explores both the physical and metaphysical implications of contact. This research has demonstrated that for most individuals contact can be a transformative/spiritual experience, where individuals, such as those termed Star Children, become more aware of their multi-dimensional nature. Mary is vice-president of the Star Child Project, which seeks to research and support Star Children and their families.

Tongue twister:
Matej Kus spoke
fluent English
when he woke
after a bike crash

Pictures: North News

Czech who bounced... into English

BY SARAH GETTY

A SPEEDWAY rider from the Czech Republic woke after being knocked out in a crash to discover he could speak perfect English.

Matej Kus, who barely knew the language beforehand, came around in an ambulance after the smash and began speaking English fluently.

The 18-year-old had been unconscious for 45 minutes after spinning out of control while racing for the Berwick Bandits on a track in Glasgow.

Team promoter Peter Waite said: 'It was unbelievable to hear him talk at all - never mind in English. It floored us all.'

'It was in a really clear English accent. Matej asked who he was when he came round and he didn't even know that he was Czech.'

'Before his crash, his use of the English

language was broken, to put it mildly. I'm not a doctor but even I can tell you that it's not normal.'

Bandits spokesman Lawrence Heppell said: 'Matej had spun out of control right in front of a rider who had nowhere to go except over Matej's head.'

Mr Kus injured ligaments in his left knee in the accident on Sunday and is on crutches. He has been told to take it easy for a month.

The rider, who turned 18 on Tuesday, has now returned to his home in the city of Plzen, west of Prague.

The ability to speak a language without having learned it is known as xenoglossy. There are just a handful of recorded cases and scientific research is rare.
