Russian Researchers: The Human "Junk-DNA" is a Biological Internet

This is absolutely ground breaking research. There's something quite gratifying when the lines between science and spirituality fade away. ~BK

July 23, 2013 - Only 10% of our **DNA** is used for building proteins, while the other 90% are called "Junk DNA"

Russian researchers, however, convinced that nature was not dumb, joined linguists and geneticists in a venture to explore those 90% of "junk DNA." Their results, findings and conclusions are simply revolutionary!

THE HUMAN **DNA** IS A BIOLOGICAL INTERNET and superior in many aspects to the artificial one. Russian scientific research directly or indirectly explains phenomena such as clairvoyance, intuition, spontaneous and remote acts of healing, self healing, affirmation techniques, unusual light/auras around people (namely spiritual masters), mind's influence on weather patterns and much more. In addition, there is evidence for a whole new type of medicine in which **DNA** can be influenced and reprogrammed by words and frequencies WITHOUT cutting out and replacing single genes.

THE RUSSIANS HAVE BEEN ENGINEERING DNA WITH FREQUENCY FOR A LONG TIME

Only 10% of our DNA is being used for building proteins. It is this subset of DNA that is of interest to western researchers and is being examined and categorized. The other 90% are considered “junk DNA.” The Russian researchers, however, convinced that nature was not dumb, joined linguists and geneticists in a venture to explore those 90% of “junk DNA.” Their results, findings and conclusions are simply revolutionary! According to them, our DNA is not only responsible for the construction of our body but also serves as data storage and in communication. The Russian linguists found that the genetic code, especially in the apparently useless 90%, follows the same rules as all our human languages. To this end they compared the rules of syntax (the way in which words are put together to form phrases and sentences), semantics (the study of meaning in language forms) and the basic rules of grammar. They found that the alkalines of our DNA follow a regular grammar and do have set rules just like our languages. So human languages did not appear coincidentally but are a reflection of our inherent DNA.

AMAZING, HUMANS PICKED UP ON THE MUSIC OF CREATION AND TURNED IT INTO A LANGUAGE.

The Russian biophysicist and molecular biologist Pjotr Garjajev and his colleagues also explored the vibrational behavior of the DNA. [For the sake of brevity I will give only a summary here. For further exploration please refer to the appendix at the end of this article.] The bottom line was: “Living chromosomes function just like solitonic/holographic computers using the endogenous DNA laser radiation.” This means that they managed for example to modulate certain frequency patterns onto a laser ray and with it influenced the DNA frequency and thus the genetic information itself. Since the basic structure of DNA-alkaline pairs and of language (as explained earlier) are of the same structure, no DNA decoding is necessary.

One can simply use words and sentences of the human language! This, too, was experimentally proven! Living DNA substance (in living tissue, not in vitro) will always react to language-modulated laser rays and even to radio waves, if the proper frequencies are being used.

This finally and scientifically explains why affirmations, autogenous training, hypnosis and the like can have such strong effects on humans and their bodies. It is entirely normal and natural for our DNA to react to language. While western researchers cut single genes from the DNA strands and insert them elsewhere, the Russians enthusiastically worked on devices that can influence the cellular metabolism through suitable modulated radio and light frequencies and thus repair genetic defects.

Garjajev’s research group succeeded in proving that with this method chromosomes damaged by x-rays for example can be repaired. They even captured information patterns of a particular DNA and transmitted it onto another, thus reprogramming cells to another genome. So they successfully transformed, for example, frog embryos to salamander embryos simply by transmitting the DNA information patterns! This way the entire information was transmitted without any of the side effects or disharmonies encountered when cutting out and re-introducing single genes from the DNA. This

represents an unbelievable, world-transforming revolution and sensation! All this by simply applying vibration and language instead of the archaic cutting-out procedure! This experiment points to the immense power of wave genetics, which obviously has a greater influence on the formation of organisms than the biochemical processes of alkaline sequences.

Esoteric and spiritual teachers have known for ages that our body is programmable by language, words and thought. This has now been scientifically proven and explained. Of course the frequency has to be correct. And this is why not everybody is equally successful or can do it with always the same strength. The individual person must work on the inner processes and maturity in order to establish a conscious communication with the DNA. The Russian researchers work on a method that is not dependent on these factors but will ALWAYS work, provided one uses the correct frequency.

But the higher developed an individual's consciousness is, the less need is there for any type of device! One can achieve these results by oneself, and science will finally stop to laugh at such ideas and will confirm and explain the results. And it doesn't end there. The Russian scientists also found out that our DNA can cause disturbing patterns in the vacuum, thus producing magnetized wormholes! Wormholes are the microscopic equivalents of the so-called Einstein-Rosen bridges in the vicinity of black holes (left by burned-out stars). These are tunnel connections between entirely different areas in the universe through which information can be transmitted outside of space and time. The DNA attracts these bits of information and passes them on to our consciousness. This process of hyper communication is most effective in a state of relaxation. Stress, worries or a hyperactive intellect prevent successful hyper communication or the information will be totally distorted and useless.

In nature, hyper communication has been successfully applied for millions of years. The organized flow of life in insect states proves this dramatically. Modern man knows it only on a much more subtle level as "intuition." But we, too, can regain full use of it. An example from Nature: When a queen ant is spatially separated from her colony, building still continues fervently and according to plan. If the queen is killed, however, all work in the colony stops. No ant knows what to do. Apparently the queen sends the "building plans" also from far away via the group consciousness of her subjects. She can be as far away as she wants, as long as she is alive. In man hyper communication is most often encountered when one suddenly gains access to information that is outside one's knowledge base. Such hyper communication is then experienced as inspiration or intuition. The Italian composer Giuseppe Tartini for instance dreamt one night that a devil sat at his bedside playing the violin. The next morning Tartini was able to note down the piece exactly from memory, he called it the Devil's Trill Sonata.

For years, a 42-year old male nurse dreamt of a situation in which he was hooked up to a kind of knowledge CD-ROM. Verifiable knowledge from all imaginable fields was then transmitted to him that he was able to recall in the morning. There was such a flood of information that it seemed a whole encyclopedia was transmitted at night. The majority of facts were outside his personal knowledge base and reached technical details about which he knew absolutely nothing.

When hyper communication occurs, one can observe in the DNA as well as in the human being special phenomena. The Russian scientists irradiated DNA samples with laser light. On screen a typical wave pattern was formed. When they removed the DNA sample, the wave pattern did not disappear, it remained. Many control

experiments showed that the pattern still came from the removed sample, whose energy field apparently remained by itself. This effect is now called phantom DNA effect. It is surmised that energy from outside of space and time still flows through the activated wormholes after the DNA was removed.

THE ANUs ARE EVERY WHERE - PART OF THE INFINITE FIELD OF CONSCIOUSNESS THAT WE ARE TRYING TO BREAK INTO. THUS, THE PHANTOM DNA EFFECT IS SIMPLY ACTIVATING ANUs IN THE AETHER. LIKE ATTRACTS LIKE

The side effect encountered most often in hyper communication also in human beings are inexplicable electromagnetic fields in the vicinity of the persons concerned. Electronic devices like CD players and the like can be irritated and cease to function for hours. When the electromagnetic field slowly dissipates, the devices function normally again. Many healers and psychics know this effect from their work. The better the atmosphere and the energy, the more frustrating it is that the recording device stops functioning and recording exactly at that moment. And repeated switching on and off after the session does not restore function yet, but next morning all is back to normal. Perhaps this is reassuring to read for many, as it has nothing to do with them being technically inept, it means they are good at hyper communication.

THE 2-D ENERGY ABSORBS 3-D ENERGY. 2-D ENERGY IS HOME / NATURE.

In their book "Vernetzte Intelligenz" (Networked Intelligence), Grazyna Gosar and Franz Bludorf explain these connections precisely and clearly. The authors also quote sources presuming that in earlier times humanity had been, just like the animals, very strongly connected to the group consciousness and acted as a group. To develop and experience individuality we humans however had to forget hyper communication almost completely. Now that we are fairly stable in our individual consciousness, we can create a new form of group consciousness, namely one, in which we attain access to all information via our DNA without being forced or remotely controlled about what to do with that information. We now know that just as on the internet our DNA can feed its proper data into the network, can call up data from the network and can establish contact with other participants in the network. Remote healing, telepathy or "remote sensing" about the state of relatives etc.. can thus be explained. Some animals know also from afar when their owners plan to return home. That can be freshly interpreted and explained via the concepts of group consciousness and hyper communication. Any collective consciousness cannot be sensibly used over any period of time without a distinctive individuality. Otherwise we would revert to a primitive herd instinct that is easily manipulated.

Hyper communication in the new millennium means something quite different: Researchers think that if humans with full individuality would regain group consciousness, they would have a god-like power to create, alter and shape things on Earth! AND humanity is collectively moving toward such a group consciousness of the new kind. Fifty percent of today's children will be problem children as soon as they go to school. The system lumps everyone together and demands adjustment. But the individuality of today's children is so strong that they refuse this adjustment and giving up their idiosyncrasies in the most diverse ways.

At the same time more and more clairvoyant children are born [see the book "China's Indigo Children" by Paul Dong or the chapter about Indigos in my book "Nutze die

taeglichen Wunder”(Make Use of the Daily Wonders)]. Something in those children is striving more and more towards the group consciousness of the new kind, and it will no longer be suppressed. As a rule, weather for example is rather difficult to influence by a single individual. But it may be influenced by a group consciousness (nothing new to some tribes doing it in their rain dances). Weather is strongly influenced by Earth resonance frequencies, the so-called Schumann frequencies. But those same frequencies are also produced in our brains, and when many people synchronize their thinking or individuals (spiritual masters, for instance) focus their thoughts in a laser-like fashion, then it is scientifically speaking not at all surprising if they can thus influence weather.

Researchers in group consciousness have formulated the theory of Type I civilizations. A humanity that developed a group consciousness of the new kind would have neither environmental problems nor scarcity of energy. For if it were to use its mental power as a unified civilization, it would have control of the energies of its home planet as a natural consequence. And that includes all natural catastrophes!!! A theoretical Type II civilization would even be able to control all energies of their home galaxy. In my book “Nutze die taeglichen Wunder,” I have described an example of this: Whenever a great many people focus their attention or consciousness on something similar like Christmas time, football world championship or the funeral of Lady Diana in England then certain random number generators in computers start to deliver ordered numbers instead of the random ones. An ordered group consciousness creates order in its whole surroundings!

WILL SOMEBODY SMACK OUR SPIRITUAL LEADERS INTO LEADING WORLDWIDE GROUP MEDITATIONS?? THEY SHOULD HAVE THEIR ASS KICKED INTO GEAR.

When a great number of people get together very closely, potentials of violence also dissolve. It looks as if here, too, a kind of humanitarian consciousness of all humanity is created.(The Global Consciousness Project)

To come back to the DNA: It apparently is also an organic superconductor that can work at normal body temperature. Artificial superconductors require extremely low temperatures of between 200 and 140°C to function. As one recently learned, all superconductors are able to store light and thus information. This is a further explanation of how the [DNA](#) can store information.

ONCE THE WHOLE BODY BECOMES A SUPER CONDUCTOR, THEN IT WILL LEVITATE LIKE SUPER CONDUCTORS DO. ALL OF OUR DNA IS SUPER CONDUCTING, IF ONE PROVIDES ENOUGH LIGHT, THEN THE DNA WILL CORRECT AS SHOWN BY THE SUN GAZERS:

<http://blog.hasslberger.com/docs/LIGHT%20DETAILS-2.pdf>

THE BODY'S CELL WATER IS STRUCTURED AS A TETRAHEDRON, LIKE A QUARTZ CRYSTAL, WHICH FLOWS AND AMPLIFIES LIGHT. AND THE BODY'S CONNECTIVE TISSUE IS ALL SUPER CONDUCTING, ALSO. THE HUMAN BODY IS HARD WIRED TO ACHIEVE ENLIGHTENMENT.

There is another phenomenon linked to [DNA](#) and wormholes. Normally, these super small wormholes are highly unstable and are maintained only for the tiniest fractions of a second. Under certain conditions stable wormholes can organize themselves which then form distinctive vacuum domains in which for example gravity can transform into electricity.

Vacuum domains are self-radiant balls of ionized gas that contain considerable amounts of energy. There are regions in Russia where such radiant balls appear very often. Following the ensuing confusion the Russians started massive research programs leading finally to some of the discoveries mentioned above. Many people know vacuum domains as shiny balls in the sky. The attentive look at them in wonder and ask themselves, what they could be. I thought once: "Hello up there. If you happen to be a UFO, fly in a triangle." And suddenly, the light balls moved in a triangle. Or they shot across the sky like ice hockey pucks. They accelerated from zero to crazy speeds while sliding gently across the sky. One is left gawking and I have, as many others, too, thought them to be UFOs. Friendly ones, apparently, as they flew in triangles just to please me. Now the Russians found in the regions, where vacuum domains appear often they sometimes fly as balls of light from the ground upwards into the sky, that these balls can be guided by thought. One has found out since that vacuum domains emit waves of low frequency as they are also produced in our brains.

And because of this similarity of waves they are able to react to our thoughts. To run excitedly into one that is on ground level might not be such a great idea, because those balls of light can contain immense energies and are able to mutate our genes. They can, they don't necessarily have to, one has to say. For many spiritual teachers also produce such visible balls or columns of light in deep meditation or during energy work which trigger decidedly pleasant feelings and do not cause any harm. Apparently this is also dependent on some inner order and on the quality and provenance of the vacuum domain. There are some spiritual teachers (the young Englishman Ananda, for example) with whom nothing is seen at first, but when one tries to take a photograph while they sit and speak or meditate in hyper communication, one gets only a picture of a white cloud on a chair. In some Earth healing projects such light effects also appear on photographs. Simply put, these phenomena have to do with gravity and anti-gravity forces that are also exactly described in the book and with ever more stable wormholes and hyper communication and thus with energies from outside our time and space structure.

Earlier generations that got in contact with such hyper communication experiences and visible vacuum domains were convinced that an angel had appeared before them. And we cannot be too sure to what forms of consciousness we can get access when using hyper communication. Not having scientific proof for their actual existence (people having had such experiences do NOT all suffer from hallucinations) does not mean that there is no metaphysical background to it. We have simply made another giant step towards understanding our reality.

Official science also knows of gravity anomalies on Earth (that contribute to the formation of vacuum domains), but only of ones of below one percent. But recently gravity anomalies have been found of between three and four percent. One of these places is Rocca di Papa, south of Rome (exact location in the book "Vernetzte Intelligenz" plus several others). Round objects of all kinds, from balls to full buses, roll uphill. But the stretch in Rocca di Papa is rather short, and defying logic skeptics still flee to the theory of optical illusion (which it cannot be due to several features of the location).
